From a third-world country to one of the most developed nations in the world, Singapore achieved this within 50 years, which is significantly faster than other similar first-class cities. As Surbana Jurong is a part of the driven force behind this miracle, we are eager to share the evolution success of Singapore with the world through our range of smart city solutions: Smart City Planning and Management, Smart City Infrastructure Monitoring and Management and Smart City in a Box.

Transforming Cities, Sustaining Growth

The journey starts with smart city readiness evaluation with recommendation and followed up by development planning. Depending on customers’ requirements, Surbana Jurong (SJ) is able to extend its services to implement the Smart City in a Box solutions and manage its operation.

Smart City Planning and Management focuses on four essential aspects of a city:

1. **Sustainability**: The city’s ability to balance its present needs (social, economical, and environmental) while not compromising the needs of future generations.
2. **Efficiency**: Overall infrastructure effectiveness, as well as the associated services’ operations.
3. **Provision of quality services to residents and active civic engagement schemes.**
4. **The 4 related risks of scarcity of supply/resource, uncertainty, environment and disruptions/attacks.**

The city’s ability to balance its present needs (social, economical, and environmental) while not compromising the needs of future generations.

SJ has developed a set of apps based on the four pillars of a Smart City - Sustainability, Efficiency, People and Security. These apps can be used independently or in conjunction with other apps for a seamless monitoring and management.
We deliver total urban and infrastructure solutions to support social and economic growth.

As one of Asia’s leading consultancy powerhouses for urbanisation and infrastructure developments, we have a distinguished track record in shaping Singapore’s urban and industrial landscape over the last 50 years.

Our multi-disciplinary team of specialists provides one-stop complete value chain consultancy services harnessed through years of successfully completing a wide array of projects in more than 200 cities in over 50 countries worldwide. We have designed and completed more than a million homes in Singapore, completed master plans for over 30 countries and developed more than 50 industrial parks around the world.

With the acquisitions of SMEC Holdings, a world-renowned infrastructure engineering designer, and AETOS Holdings, a total security solution provider, Surbana Jurong has a combined global workforce of over 13,000 employees in over 110 offices across Asia, Australia, Africa, the Middle East and the Americas.
